Technical Skills

Backend:

Laravel, PHP, REST API, JWT Authentication

Frontend:

Vue.js, JavaScript, HTML5, CSS3, Bootstrap,

Tailwind CSS

Database:

MySQL, SQL Server, Database Design, Query

Optimization, Indexing

Architecture & Design:

SOLID Principles, OOP, Repository Pattern, Service

Layer Pattern, MVC, N-Tier Architecture

Tools & DevOps:

Docker, Git, GitHub, Postman, Figma, Draw.io

Methodologies:

Agile, Scrum, Kanban, Code Review

Professional Summary

Laravel Full Stack Developer with over 2 years of experience developing scalable, secure, and high-performance web applications using Laravel, PHP, Vue.js, MySQL, and Docker. Skilled in designing RESTful APIs, implementing Role-Based Access Control (RBAC), optimizing database performance, and applying clean architecture and software design principles. Proven track record of delivering enterprise-level solutions across training management, point-of-sale (POS), and employee management systems. Strong problem-solving abilities with a focus on maintainable code, system reliability, and user-centric application development.

Professional Experience

Laravel Full Stack Developer

ITVision Hub

2024 – 2026

- Designed, developed, and maintained Laravel-based business applications following MVC architecture and industry best practices.
- Built secure RESTful APIs with authentication, authorization, and Role-Based Access Control (RBAC).
- Implemented Laravel Policies and Middleware to enforce granular security permissions.
- Reduced database query execution time by approximately 40% through indexing strategies and query optimization.
- Containerized applications using Docker to streamline development and deployment workflows.
- Collaborated with a team of 5+ developers and stakeholders to deliver production releases on schedule.
- Participated in Agile development processes, including sprint planning, task estimation, code reviews, and deployment activities.
- Utilized Git and GitHub for version control and collaborative development.
- Contributed to software architecture decisions, feature planning, testing, and production releases.

Key Projects

Training Management System

Tech Stack: Laravel, MySQL, Tailwind CSS, Socialite, Google ReCAPTCHA, Service-Repository Pattern, N-Tier Architecture

- Built a full-scale Training Management System covering courses, scheduling, enrollment, attendance, finance, and reporting.
- Implemented RBAC (Admin, Instructor, Editor, Staff, Student) with Social Login (Google/GitHub) and 2FA & Google ReCAPTCHA
- Developed recurring class scheduling with automatic session generation and instructor conflict detection. Built student enrollment, attendance tracking, instructor workload management, and finance reporting.
- Designed dashboards with analytics and exportable reports using JQuery Data Table (PDF/Excel).
- Applied Service-Repository architecture to decouple business logic, ensuring a maintainable codebase.

Education

Bachelor of Computer Science (B.C.Sc)

University of Computer Studies, Hinthada
2017 – 2024 (Graduated: 2024)

Languages

- Myanmar (Native)
- English (Professional Working Proficiency)

Additional Projects

Laravel POS & Order Management System

Tech Stack: Laravel, MySQL, JavaScript, CSS3, HTML5

- Developed a multi-role POS system (Super Admin, Admin, User).
- Implemented real-time order status tracking and daily sales reporting.
- Designed role-based permissions and audit logs for administrative actions.

GitHub: <https://github.com/winmyatphyo99/laravel-pos-system>

Food Order Management System

Tech Stack: PHP (MVC), MySQL, JavaScript, CSS3, HTML5

- Developed a full-stack Food Order Management System using Pure PHP following MVC architecture to ensure a clean separation of concerns.
- Built customer-facing features including product browsing, shopping cart management, and secure checkout workflows.
- Admin Dashboard: Managed menu items, tracked sales analytics, and handled order fulfillment status.
- User Portal: Facilitated seamless browsing, cart management, and secure checkout workflows.
- Applied MVC principles to maintain clean and organized code architecture.
